**DECISIONING DETAIL****BUSINESS CREDIT RISK SCORE™ 480****REASON CODES**

- \* Number of Non-Financial Trades Suggests Higher Risk

**Business Credit Risk Score™**

The Business Credit Risk Score™ is designed to assist credit grantors in improving risk assessment throughout a business's account life cycle, reducing delinquency rates and improving profitability. The score predicts the likelihood of a business incurring greater than 90 days severe delinquency or bankruptcy, within a 12 month period.

Score range is 101 - 660, with the lower score indicating higher risk. A 0 indicates a bankruptcy on file and manual review is recommended. Up to four reason codes may be returned indicating the top factors influencing the score.

**BUSINESS FAILURE RISK RATING™ 3****Business Failure Risk Rating™**

The Business Failure Risk Rating™ is designed to assist credit grantors in improving risk assessment throughout a business's account life cycle, reducing delinquency rates and improving profitability. The rating predicts the likelihood of a business failure through either formal or informal bankruptcy within a 12-month period.

Rating range is 1 - 9, with the lower class indicating lower risk. A 0 indicates a bankruptcy on file and manual review is recommended. Up to four reason codes may be returned indicating the top factors influencing the rating.

**NOTES**

1. Summary - Open Non-Financial Accounts by Industry Group and Summary - Open Financial Accounts by Account Type Past Due Amount percentages may not equal 100% due to rounding and/or how the Creditor applies credits.
2. When summing the aging buckets in the Summary and Credit Experiences tables the sum may not equal the Past Due Amount because some Creditors apply credits only to the Past Due category and not the aging buckets.
3. Charged-off accounts in the Closed Summary tables return the balance at the time of charge off. This amount may not be the actual charged-off amount because only a portion of this balance may be charged off or credits, late fees, and penalties may have not yet been applied. The Charged Off Amount in the Report Highlights section is what the Creditor has reported as charged off at the time of inquiry.
4. Past due item(s) may be the result of lost or disputed invoices.
